IN THE CLAIMS:

Please amend the claims as follows:

1-19. (Previously Cancelled).

20. (Currently Amended) Compacted eCarbon black pellets, prepared from uncompacted carbon black powder, having a relative color intensity, based on the uncompacted carbon black powder, of greater than 100% which have been compacted two or more times with different compressive forces and/or wherein the pellets comprise one or more binders and/or dispersants in a total quantity of between 10 to 25 wt.%, based on the weight of the pellets.

New

- 21. (Currently Amended) The pellets of Claim 20 wherein the pellets have an average particle size of 0.3 to 2 mm and a quotient of pyconometric pycnometric density and bulk density between 3.0 and 10.
 - 22. (Currently Cancelled).
- 23. (Previously Added) The pellets of Claim 22 wherein the binder comprises a liquid polyol, polyether, polyester, oil, water or an aqueous solution of a polymeric salt or molasses.
- 24. (Previously Added) The pellets of Claim 22 wherein the dispersant comprises a lignin sulfonate or a naphthalene/formaldehyde condensation product.
- 25. (Currently Amended) A process for the production of carbon black pellets which comprises compacting carbon black two or more times with different compressive forces in the presence of an auxiliary substance in a total quantity of between 10 to 25 wt.%, based on the weight of the pellets and comminuting the compacted carbon black to pellets having an average particle size of 0.3 to 2 mm and a quotient of pyconometric pycnometric density and bulk density between 3.0 and 10.

6

- 26. (Currently Cancelled).
- 27. (Previously Amended) The process of Claim 25 comprising performing the compaction two or more times at different compressive forces.
- 28. (Previously Added) The process of Claim 25 comprising using compression forces of between 1 and 100 kN/cm.
- 29. (Previously Added) The process of Claim 25 comprising performing the compaction by screws, rollers, die presses or extruders.
 - 30. (Currently Deleted).
- 31. (Previously Added) The process of Claim 30, wherein the binder comprises a liquid polyol, polyether, polyester, oil, water or an aqueous solution of a polymeric salt or molasses.
- 32. (Previously Added) The process of Claim 30 wherein the dispersant comprises a lignin sulfonate and a naphthalene/formaldehyde condensation product.
- 33. (Previously Amended) The process of Claim 25 comprising coating the resulting pellets with wax, polyether, polyolefin or polyvinyl alcohol.
- 34. (Previously Added) The process of Claim 33 comprising adding a preservative and/or fragrance to the wax, polyether, polyolefin or polyvinyl alcohol.
